REGIONAL MUNICIPALITY OF HALTON

Report to	Chairman and Members of the Administration and Finance Committee
From	Matthew Fischer, C.I.D. Director of Business Development
Date	1983 02 01
Report No.	B.D. 6/83
Re:	'83 Year End Report of Economic Activity

RECOMMENDATION:

That Report B.D.6/83, entitled "'83 Year End Report of Economic Activity" be received for information.

REPORT:

The Business Development Department has prepared a report analysing a number of indicators of the economic performance of Regional industry for Council's information.

The report examines the following factors:

- -Building permits for both Industrial and Commercial construction and the Total of all permits
- -Contacts as a result of our advertising and promotions
- -New company locations and substantial expansions of existing companies
- -Company closures and moves both within the Region and outside the Region
- -The net employment change in the Manufacturing sector

These indicators suggest that while the recession of 1982 did indeed have an impact on development in Halton, the Region fared remarkably well in comparison to other jurisdictions in the country.

BUILDING PERMIT INFORMATION:

A table of the Building Permit Reports from each of the Region's four municipalities is appended to this report. It shows the monthly accumulated permit values for both Industrial and Commercial construction and the Total of All Construction by municipality.

New construction was severely constrained in 1982, in Halton, as everywhere. New industrial and commercial construction in the Region was down 62% from 1981 levels.

Industrial and Commercial Building Permits

	Burlington	Halton Hills	Milton	Oakville
Change	-49%	-72%	-39%	-70%

The tables also show that the total of all construction followed a similar downturn pattern with the total for the Region down 50% from the 1981 levels.

Total of All Building Permits

	Burlington	Halton Hills	Milton	Oakville
Change	-35%	-65%	-45%	-58%

It is very important that this information be considered in perspective. Firstly, 1981 was a record breaking year in Halton for the amount of new construction; secondly while the building permits are down markedly the results still reflect new construction. The Region continues to grow -- just more slowly than in 1981. Comparable information from our neighbours is;

Comparative Industrial and Commercial Permits

	'81	'82	
Hamilton/Wentworth	77,443,000	53,568,000	-31%
Peel	272,895,000	119,187,000	-64%
Halton	63,133,000	24,321,000	-62%

INQUIRIES AT THE BUSINESS DEVELOPMENT DEPARTMENT:

As Council has heard us say several times during the course of the year, inquiries at the Business Development Department have almost doubled over previous years, primarily as a result of our increased profile and higher advertising budgets.

The following table summarizes the results of the year's inquiries:

Business Development Department

	'81	'82	
Initial Contacts	662	1154	+74%
Project files	127	153	+20%

Projects on which we work are generally multi-year efforts; in other words, we will work with a company for two to four years between the first contact and the start of construction. Therefore, the propects for the coming years appear to be bright.

NEW COMPANY LOCATIONS AND SUBSTANTIAL EXPANSIONS:

Appended to this Report is a list of the new companies, that the Business Development Department is aware of, having made an announcement of a new location within Halton or alternately, existing companies undergoing substantial expansions. The list includes 84 companies employing almost 700 people and is broken down as follows;

New Companies Established in 1982

	Burlington	HaltonHills	Milton	Oakville
Companies	29	7	21	27
Employment	299	45	143	210

Total for Halton Region

Companies	84	Employment	697

COMPANY CLOSURES AND MOVES:

As part of the analysis of the information solicited for the new Industrial Directory, we examined the manufacturing companies that we are aware of having closed their doors or moved to another location.

We have summarized this information for Council's benefit as follows:

Companies Lost During 1982

	Closed	Moved within Halton	Moved out of Halton
Burlington	27	2	7
Halton Hills	14	0	1
Milton	6	1	0
Oakville	23	4	2
Region	70	7	10

NET EMPLOYMENT CHANGE: MANUFACTURING

Lastly, we have totalled the net employment change in the Manufacturing sector. This includes closed companies, layoffs and cutbacks, expansions of existing firms and some of the new company locations (particularly those early in the year). A number of the firms identified in the new companies list are not included in the survey, but will show up in the 1983 results next year.

The results show that Halton Region held its own against the recession showing a net employment change of only -1% in the manufacturing sector. This is a notable achievement for 1982. Milton showed the most positive change reporting an 11% increase in employment from 1981 to 1982. Halton Hills is the one troubled spot in the Region showing a decline in manufacturing employment of 7%.

HALTON REGION MANUFACTURING EMPLOYMENT

	1977	1978		1979		1980		1981		1982	
RLINGTON	12,928	12,920	-1%	13,301	+3%	14,680	+10%	17,684	+20%	17,334	-2%
LTON HILLS	3,537	3,645	+3%	4,573	+21%	4,274	-7%	4,510	+7%	4,190	-7%
LTON	2,011	2,441	+21%	2,064	-8%	3,392	+64%	2,879	-15%	3,183	+11%
KVILLE	15,580	17,201	+10%	16,922	-2%	14,283	-16%	14,594	+2%	14,478	-1%
GION	34,056	36,207	+6%	36,860	+2%	36,629	-1%	39,667	+8%	39,185	-1%

OURCE : Business Development Department, Industrial Directories.

SUMMARY:

An analysis of the foregoing data suggests that, while we did not experience the growth rates of previous years, the Region did maintain its relative manufacturing strength during the recession. The new companies that located in Halton offset the layoffs and cut backs which dominated the newspapers throughout the year.

Economic recovery is forecast for 1983, by virtually every pundit, although its full impact is not expected until later in the year. This will cause many employers to call back some of their laid-off employees but most experts agree that a great many more will never be called back.

A number of programs have been instituted by the senior levels of government to address the retraining needs of this group.

The number of inquiries the Department is receiving is an encouraging sign and leads us to believe that, with economic recovery, Halton will once again experience the rapid industrial growth which we have witnessed over the last decade. This will hopefully provide employment for many of those who became redundant in the more efficient companies that have emerged from the recession.

The basic locational factors of proximity to markets and excellent transportation systems, continue to make Halton one of the most attractive sites for development in Ontario.

The Business Development Department is focusing its energies on Halton Hills companies, as a priority, to address the decline in manufacturing employment experienced in that municipality. Specific local projects are being developed and high potential companies are being identified for concentrated efforts in Export Development and other programs.

Respectfully submitted,

Matthew Fischer, C.I.D.

HALTON REGION - AT THE CENTRE OF SUCCESS

The Regional Municipality of Halton represents the four area municipalities of Burlington, Halton Hills, Milton and Oakville. Halton is the most ideal location for businesses desiring access to both the Metro Toronto and Hamilton markets.

Halton Region has the benefits of a broadly developed base of wide ranging industrial interests providing a cushion against economic downturn in individual sectors of the national or regional economy.

It enjoys a prime location within 400 miles of half the population, and also half the productive capacity of the North American continent. The work force within the Region enjoys a standard of educational, trade and business training well above the norm for the Province of Ontario.

The lifestyle of Halton projects the historic advantages of smaller town atmosphere and neighbourliness, with its social and service club involvement opportunites, while the sophisticated cultural and entertainment facilities of major arts and urban centres are literally on the doorstep.

Living costs are refreshingly attractive, primarily because housing prices are comfortably below corresponding levels in other areas.

Add to these plus factors the remarkable range of transportation facilities established within Halton, giving efficient and low cost access to international markets and suppliers; the selection of prime industrial and commercial land, fully serviced, at competitive prices; and industrial and commercial leasing opportunities at rates lower than those neighbouring communities. Then consider the generous outdoor and indoor sports and recreational facilities; and a composite of Halton Region is established.

The final advantage is that in dealing with Halton Region you are assured of personal attention providing professional and confidential advice for the specific needs of your company. Just call us, and discover for yourself.

INDUSTRIAL SITES IN HALTON REGION

Halton Region has had considerable development over the last decade and as a result many of Canada's major development companies have industrial sites in the Region.

Summarized on the following pages is a list of Industrial Parks located throughout Halton. In each case, the name and address of a contact-person has been included where you can obtain additional information. Also included is a description of the park's general location, zoning designation(s) and the acreage remaining in the park for development.

In addition to the Industrial Parks listed, there is an excellent choice of individual sites and buildings available. The Halton Region Business Development Department works closely with Realestate and Development Companies in the compilation of the Halton Industrial Property Data System (H.D.S.), a computerized inventory of lands and buildings currently available throughout the Region.

For further information on sites in Halton, speak to: Brent Kearse, Business DevelopmentOfficer-Industrial Locations, or your Industrial Realtor.

TRADE DEVELOPMENT IN HALTON REGION

The primary purpose of this Industrial Directory is to acquaint Halton Region businesses with the products and services which can be found locally. Through this medium the Business Development Department attempts to facilitate the Replacement of Imports currently sourced from other parts of Canada and the world.

The information used to compile this directory is sorted by Standard Industrial Classification, developed by Statistics Canada. This makes it easier to locate the producers of certain products or services from any part of the Region.

In addition to import replacement objectives the Halton Region Business Development Department offers assistance to local firms in their Export Marketing programs.

Information can be provided on the numerous Federal and Provincial Government assistance programs available to companies engaged in Exporting (450 by one count) along with information on Trading Houses, Manufacturers Agents and the services of the Commercial Officers of the Canadian Consulates around the globe.

The Business Development Department of Halton Region is also in a position to provide practical advice and counselling to local companies considering Export Marketing. Contact: Peter Bush, Business Development Officer - Trade Development for further information.
